

**Amend Amendments to the Specification:**

Please replace paragraph [0087], on page 25 of the as-filed application with the following paragraph in its entirety, wherein markings are included to show changes made.

[0087] Advantageously, this embodiment of the invention provides that the allocator ~~logs~~ log entries are local and the B-tree ~~logs~~ log entries are distributed across multiple servers. Thus, the recovery of the system can be done by replaying the log entries stored locally to each server (which include both allocator log entries and B-tree log entries[.]).
